

RAJAT GUPTA

Engineering Manager - SRE, Platform, and Security Leadership

contact@rajatgupta.work | linkedin.com/in/rajatguptarg | github.com/rajatguptarg

rajatgupta.work | pulse.rajatgupta.work

PROFESSIONAL SUMMARY

Engineering leader with 10+ years building reliable, secure, and scalable platforms. Proven track record launching SRE best practices, developer tooling, and reliability programs. Expert in leading cross-functional teams, reducing operational toil, and driving cost optimization while maintaining high availability.

CORE COMPETENCIES

Technical Leadership

Site Reliability Engineering, Platform Engineering, DevOps, Security Engineering, Infrastructure as Code, Cloud Architecture, Distributed Systems, Microservices

Management Skills

Team Leadership, Cross-functional Collaboration, Technical Strategy, Roadmap Planning, Stakeholder Management, Incident Management, Process Optimization, Mentoring

Cloud & Infrastructure

AWS, GCP, Kubernetes, Docker, ECS, EC2, Terraform, Ansible, Packer, Hybrid Infrastructure, RedHat, VMWare

Observability

Prometheus, Grafana, DataDog, PagerDuty, AlertManager, ELK Stack, SLO/SLI Management, DORA Metrics

Tools & Technologies

Python, Go, Java, Consul, Istio, FluxCD, Backstage, GitHub Actions, Vault, Spanner, PostgreSQL

CDN & Edge

Fastly, Cloudflare, CloudFront, Edge Compute, Multi-CDN Strategy

PROFESSIONAL EXPERIENCE

REWE Digital May 2025 - Present
Sr. Engineering Manager - Paymenttools Berlin, Germany

- Lead and mentor SRE and Security engineers with focus on psychological safety and individualized growth plans
- Rolled out SRE best practices (SLOs, incident/change management, on-call) across 14 product teams
- Co-designed data platform enabling real-time analytics on 1.5B+ annual payment transactions
- Defined long-term roadmap delivering self-service platform with GenAI automation eliminating manual toil

TIDAL (Block Inc.) Jun 2022 - Mar 2025
Engineering Manager Berlin, Germany

- Led 6-person SRE team managing release, production, and monitoring strategies, cutting service disruptions by 50%
- Scaled SRE culture through training and process optimization, improving system reliability by 80% and reducing MTTR by 50%
- Partnered with Engineering and Product to revamp CI/CD and automated testing, gaining 8% uptime and

70% higher user satisfaction

- Drove Edge Compute, CDN, service discovery, and IDP projects achieving 12% cost savings and 90% observability uplift

Sony Interactive Entertainment Feb 2020 - May 2022
Site Reliability Engineer - PlayStation Berlin, Germany

- Led Platform Automation Team for PSNow, reducing manual operational tasks by 40%
- Managed hybrid infrastructure across AWS and 20+ global data centers maintaining 99.99% uptime
- Built Prometheus/Grafana observability platform ingesting 300+ GB/day metrics, cutting downtime incidents by 30%

Private Sale GmbH (eBay) Aug 2019 - Jan 2020
Senior DevOps Engineer Berlin, Germany

- Migrated critical services from on-prem to GCP, reducing infrastructure spend by 15%
- Designed CI/CD pipelines for hybrid deployments, halving release times
- Optimized cloud architecture with efficient load balancing, trimming latency by 20%

Entelios (Agder Energi) Dec 2017 - Jul 2019
Senior DevOps Engineer Berlin, Germany

- Managed distributed systems powering real-time energy trading operations
- Implemented infrastructure to remotely operate 200+ hydropower plants
- Migrated and optimized services achieving 100% availability across multiple data centers

SuitePad GmbH Feb 2017 - Nov 2017
DevOps Engineer Berlin, Germany

- Designed microservice architectures with process and data flows for hospitality platform
- Managed and monitored AWS workloads maintaining 99.99% uptime
- Enabled auto-scaling and secure delivery pipelines removing manual effort

ThoughtWorks Jul 2015 - Jan 2017
Application Developer Bengaluru, India

- Built web and mobile applications with highly available infrastructure and zero-downtime releases
- Delivered ML, big data, and microservice projects while refining requirements with clients
- Championed collaboration between product stakeholders and delivery teams

Openlabs Technologies Jan 2015 - Apr 2015
Software Developer Noida, India

- Developed ERP systems using open-source technologies for e-commerce clients
- Built scalable web applications on in-house open-source framework

KEY PROJECTS

Payment Data Platform & Analytics

Sr. Engineering Manager, REWE Digital (2025)

- Co-designed distributed data platform processing 1.5B+ annual payment transactions
- Architected real-time analytics pipeline enabling product teams to query payment data independently
- Implemented self-service APIs and GenAI-powered automation reducing manual data requests by 60%
- Built observability and monitoring layer ensuring 99.9% data accuracy and sub-second query latency

Observability Governance & IDP

Engineering Manager, TIDAL (2023-2024)

- Cut log spend by 30% and total observability cost by 12% through governance policies
- Integrated cost-per-service reporting into IDP alongside SLOs and deployments
- Automated DORA metric collection and surfaced in portal for engineering leaders
- Made telemetry actionable by co-locating runbooks, metrics, and cost data

Edge Compute for Low-Latency Streaming

Engineering Manager, TIDAL (2022-2024)

- Delivered multi-CDN edge compute yielding 8% uptime gains and 12% cost savings
- Designed edge architecture abstracting Fastly, Cloudflare, and CloudFront behind policy-driven routing
- Automated provisioning through Terraform enabling self-service workflows
- Improved user satisfaction by 70% through responsive worldwide streaming

Service Discovery Modernization

Engineering Manager, TIDAL (2023-2024)

- Replaced AWS App Mesh with Consul for platform-agnostic discovery
- Enabled ECS and EC2 services to evolve independently while remaining secure
- Built Terraform modules and Ansible playbooks for self-service registration
- Implemented mTLS policies as defaults, raising security baseline across estate

Platform Automation & Observability

SRE, PlayStation (2020-2022)

- Automated provisioning across 20+ data centers, reducing rack deployment from days to hours
- Built observability stack ingesting 300+ GB/day metrics for 100K+ servers
- Created self-service APIs for dashboards, alerts, and synthetic tests
- Reduced operational toil by 40%, freeing engineers for higher-leverage work

ACHIEVEMENTS

- Reduced service disruptions by 50% through implementation of SRE best practices
- Achieved 80% improvement in system reliability and 50% reduction in MTTR
- Led teams to 99.99% uptime across multiple high-scale production environments
- Cut infrastructure and observability costs by 12-30% while improving service quality
- Mentored 20+ engineers on SRE practices, platform engineering, and leadership
- Speaker at industry conferences on SRE, observability, and platform engineering
- Active contributor to open-source projects and technical blog author

TECHNICAL EXPERTISE

Languages

Python, Go, Java, Bash, SQL

Cloud Platforms

AWS (ECS, EC2, Lambda, S3, CloudFront, Secret Manager), GCP (Compute, Storage, Spanner), Multi-cloud Architecture

Container & Orchestration

Kubernetes, Docker, AWS ECS, Helm, FluxCD, GitOps

Infrastructure as Code

Terraform, Ansible, Packer, CloudFormation

Service Mesh & Discovery

Consul, Istio, AWS App Mesh, mTLS

CI/CD

GitHub Actions, Jenkins, GitLab CI, ArgoCD

Monitoring & Observability

Prometheus, Grafana, DataDog, PagerDuty, AlertManager, ELK Stack, CloudWatch, SLO/SLI Design

Security

Vault, AWS Secret Manager, Security Scanning, Compliance, mTLS, Zero Trust

CDN & Edge

Fastly, Cloudflare, CloudFront, Edge Compute, Multi-CDN Strategy

Databases

Spanner, PostgreSQL, MySQL, Redis, DynamoDB

Developer Tools

Backstage, Internal Developer Portals, Self-service Platforms, GenAI Automation

PUBLICATIONS & SPEAKING

Technical Blog: Regular contributor at pulse.rajatgupta.work covering SRE, platform engineering, and leadership topics

Conference Speaker: Presented on observability, incident management, and platform reliability at industry events

Open Source: Active contributor on GitHub (github.com/rajatguptarg)
